

Automation that thinks like a GP Partner.

Lab reports, registrations and QOF — handled the way a partner would handle them. NICE-pathway driven. Configurable to your practice. Not AI guesswork.

WHERE TO START — AND WHAT COMES NEXT

Start with **Lab Reports** — it's where the biggest hours-saved win lives, and it's where most practices begin. Once the partners see it working, add Registrations and QOF when you're ready.

Lab Reporting

START HERE

Files normal results. Flags abnormal results against your editable reference ranges. NICE-guided pathways for Lipids, Diabetes, Thyroid, Renal, FBC, PSA, Vitamin D. Biggest hours-saved win.

Registrations

ADD NEXT

Removes the 10-15 minute data-entry job per new patient. SNOMED-coded from day one — proactive care begins immediately.

QOF Optimiser

THEN THIS

Surfaces missed indicators and exception opportunities throughout the year, not in March. Configurable by clinical area and clinician.

LAB REPORTS — REAL NUMBERS, PICK YOUR SIZE

What Lab Reports delivers for a practice your size.

THE SAFETY CASE

Class I is the start. What you do with it is the rest.

- **NICE pathways, not AI guesswork.** Every decision follows the published pathway. Where pathway is unclear, the result stays with the clinician — by design.
- **Editable reference ranges.** Your practice sets its own thresholds — by clinician, by patient cohort. Standard NHS ranges flag too much noise.
- **100% auditable.** Every action logged with the clinical reason. Trend analysis catches deterioration a single-result check would miss.

FROM PARTNERS LIKE YOURS

"Built by GPs, for GPs — and it shows. Big difference to our workload from day 1. In 7 months our bot has filed over 8,000 test results."

Dr George Naylor · GP Partner, Shipston Medical Centre

"We trialled another provider for three weeks but quickly realised GP Automate was the right choice. Testing alternatives has only confirmed the superiority of GP Automate's product."

Dr Varun Bhalla · Belvedere Medical Centre

WHAT WE'RE ASKING FOR

15 minutes at your next partners' meeting.

One of our sales team will dial in. They'll bring the demo, the numbers for your list size, and answers to whatever the partners ask. Every demo ends with a choice: a 30-day configured trial (no credit card), or 3 months at 50% off.

BOOK IT

gpautomate.com/book-demo

If they say no, you've lost 15 minutes. If they say yes — see the numbers above.
